

WorkBench

Unified. Tailored. Secured.

The “*Productivity Paradox*”

Your teams are already using AI and sharing your data across multiple providers. Every day, new services are emerging. Each new subscription drains budget – adding inefficiencies, security gaps, data silos that puts your entire organization at risk.

WorkBench™ streamlines AI solutions by providing access to state-of-the-art models from all major providers in a single managed-platform that is customized exactly to your organization's unique needs.

Model Providers + Strategic Partnerships

ANTHROPIC

Grok

IBM

MISTRAL AI

NVIDIA

OpenAI

Capgemini

databricks

LangChain

NIST

ORACLE

ZEALSTRAT

WorkBench

UNIFY: *One Workspace. Every Model.*

Stop juggling subscriptions. WorkBench consolidates every AI model and built for tomorrow's breakthroughs—into one intuitive interface. No token limits or usage caps. Just pure capability.

- Rapid model updates to ensure you have the latest & greatest.
- Unlimited generations + multi-model switching + parallel generation.
- Seamless integrations connect to Snowflake, Salesforce, M365, and 500+ platforms through API, MCP, or custom plugins.

TAILOR: *Your Business. Your Rules. Your AI.*

Generic AI delivers generic results. Workbench becomes your organization's collective intelligence through:

- Unlimited specialized agents with each expertly crafted and tuned for your specific business needs and functions.
- Custom knowledge base that understand your industry, your data, your context for instantaneous assimilation and less prompting.
- Curate and build prompt libraries with pre-written & professionally tested prompts for almost every business scenario imaginable.
- Configurable outputs that match your brand voice, format requirements, style, tone, language, and compliance needs.
